

ZZR-X — THE ULTIMATE HIGH SPEED TOURER

The ZZR-X is Kawasaki's idea of the ideal high-speed touring machine. Offering superb high-speed comfort and brilliant handling performance, this supersport tourer of the future is loaded with leading-edge sport touring technology. Mode-change mechanisms allow the rider to select the riding position and functionality to suit conditions. Cone-shaped rim-mounted brake discs deliver amazing cooling efficiency, while variable flaps deliver speed-sensitive wind protection. And a centre-mounted fuel tank contributes to mass centralisation and responsive handling. This advanced supersport touring technology makes the rider feel like a part of the machine and makes sport touring more enjoyable than ever. Other interesting features include a muffler built into the cowling and a capacious storage area in front of the seat, giving the ZZR-X the functionality of a sport tourer with the aggressive lines of a supersport bike. This is the ultimate high-speed tourer. ZZR-X. The future of supersport touring.

- **"High-Speed Touring Mode"** — Panniers fitted and ready for comfortable high-speed touring.
- **"Touring Mode"** — Collapsible backrest in the up-position for increased comfort when two-up touring across the continent
